

Put Dots & Muse *to work.*

Four useful jobs for an ongoing AI helper.

Concept illustration. Connections and access vary.

01 / 09

Give it a job worth repeating.

Tell it what to check, when to check, what to bring back, and when it should ask you.

Be ready for tomorrow's call.

Tomorrow

Ask for the call's purpose, promises already made, open questions, and source links. Check the note before the meeting.

Hear when a supplier changes.

Old → new · date · source

Could not check

Name the pages and the changes that matter. Ask for the old value, new value, date, and source.

Draft replies from your FAQ.

Approved FAQ

Stops in drafts

Human review

Give it the question and approved facts. Keep the reply in drafts. Send questions the FAQ cannot answer to the owner.

Turn your numbers *into ideas.*

Missing metrics?

No causal claim

Ask Muse to compare similar posts, show the available metrics, and suggest two ideas. A small sample cannot explain what caused a result.

Proposed Muse use. Professional account connection required. A dot needs supported access or an export.

Keep approval in your hands.

Limit the sources it can reach. Keep consequential actions under approval. Review the first runs and know how to pause the job.

Teach *the first job.*

prioraity.io/guides

The free guide includes four assignments, approval limits, and a review record you can adapt.
